Work Experience

Backend Developer September 2025 - Present
WizPlus | Seoul, South Korea

- Architected Poolim, an AI election consulting platform with a multi-stage RAG pipeline using FastAPI and PostgreSQL/pgvector for real-time voter analysis
- Built an automated crawler ingesting 500+ RSS sources and major Korean platforms across 17 regions, with sentiment analysis and voter clustering
- Engineered a distributed job queue with retry logic and stale-lock recovery to reliably handle long-running AI workloads
- Deployed full AWS production infrastructure (EC2, RDS, S3) with Docker Compose, Traefik, and a full observability stack (Sentry, CloudWatch, Langfuse)
- Developed WizAI video generation backend with NestJS and Gemini API integration
- Integrated Kakao AlimTalk, Zeptomail, and subscription billing with automated invoice generation

Frontend Developer May 2025 - August 2025
ICLO | Seoul, South Korea

- Built the Orthodontic Diary module from scratch for HomeDen, a B2B clinic platform serving dental practices nationwide
- Developed a white-label homepage generator with custom URL slugs, enabling each clinic to independently manage branded pages
- Integrated PortOne v2 payments with robust error handling for edge cases
- Delivered fully responsive legal pages (ToU, Privacy Policy, User Guide) across all device sizes
- Wired all frontend features to REST APIs via TanStack Query; managed complex UI state with XState and Zustand

Education

Bachelor's degree at Youngsan University Sep. 2021 - June 2025
